With "Pages" open in the side panel all the documents pages are listed and numbered as thumbnails. clicking on a thumbnail will open that page in the viewing window. In this instance we have clicked on page 3 ("A") to open it and the red rectangle on the thumbnail indicates how much of it is visible in the viewing window with the current magnification setting.

Clicking on the Options button ("B") gives a drop down box allowing adjustment of the thumbnail size and a print pages option.

Note:- The side panel width can be adjusted by placing the pointer to position "C" where it will change to a horizontal adjustment pointer - left click and drag to resize

Use the scroll bar to view hidden thumbnails.
