**How to Search, Surf and Browse in Internet Explorer. This Example uses the Google Search Engine which can be used in any browser - Mozilla Firefox,Opera,Google Chrome for example.**

1. Open Internet Explorer – all versions are similar to below (version 6).
2. This is a search for information about **libraries in London**. The same method can be used to search for any subject.

After clicking Google Search the results appear as below

7. Have a read of what these links say and if you feel they might have the information you're after click on the blue text at the top to open the webpages they refer to.

Sponsored Links are mostly to commercial/business websites

8. The page below has opened after clicking on – [London Libraries – London Libraries Recommend](#)

**\*NOTE –** Links on webpages come in all shapes, forms, colours and text. When you move the pointer over a link it will alter to the shape of a hand

Use your mouse scroll wheel or the side scroll bar slider to view all the page and further browse if you wish from links on the page. Use the Back button to return to previous pages (see controls below) . Some pages will be wider than your browser window – a bottom scroll bar will be seen to move the page horizontally for viewing.

### The Browser Controls in Internet Explorer 6

The layout of the browser controls can vary according to how the toolbars are positioned and how the control buttons/icons are arranged on them.

- The **Back** button returns you to the previous page. When more than one page has been opened the **Forward** button on its right can be used to navigate between pages
- Clicking **Favorites** opens a panel where you can store pages you wish to view again by using its add function
- Clicking **History** shows you the sites you have visited
- Links - With the mouse drag the IE icon in the address bar to Links to save a link to the URL in the address bar
- If a page you are trying to view is taking too long to open, click the **Stop** button.
- Opens a search window
- Print the current webpage
- Opens Outlook - Express (email)
- Click for more controls
- Takes you to your **home** page that appears every time you open Internet Explorer.
- For the Menu Bar (File etc) go to the [Internet Explorer Tutorial pages on itbuddy.org](#) ( link on homepage)
- If you get a message that a Web page cannot be displayed, or you want to make sure you have the latest version of the page, click the **Refresh** button.
