Parallel Cables

*Fully wired standard printer cable suitable for all
types of printer with a centronics type connection.
The cable is also suitable for two way (bi-directional)
printers...*

USB to Printer Cable

*USB to PRINTER cable · for connecting a parallel
printer through a usb port - "plug "n" play" for easy
installation - bi-directional for optimum
communication between printer and computer...*

Parallel Centronics Lead

*Standard centronics lead designed to connect all
centronics devices together. The lead is fully-wired
with straight pin configuration, i.e pin 1 to 1, 2 to 2, 3
to 3 etc*

Firewire Cables

*FireWire is one of the fastest peripheral standards ever developed, which
makes it great for use with multimedia peripherals such as digital video
cameras and other high-speed devices like the latest hard disk drives and
printers.*

*FireWire is integrated into PC's, laptops, Power Macs, iMacs, eMacs,
MacBooks, MacBook Pros, and the iPod. FireWire ports were also integrated
into many other computer products dating back to the Power Macintosh G3
"Blue & White" computers. All these machines include FireWire ports that
operate at up to 400 megabits per second and the latest
machines include FireWire ports that support 1394b and operate at up to 800
megabits per second.*

Privacy Information

socket is of the smaller type;

4-pin to 6-pin plugs

This is used between camcorder/peripherals and computer where the sockets provided are of the 6-pin type (pictured right);

6-pin to 6-pin plugs

Though no consumer Digital Video (DV) products contain the larger 6-pin sockets, these will be used to connect devices to the computer, such as external disk drives units.
